

Drain all water from the unit via drain plug and both the taps, once all water is removed from the unit

Step 1) Push both the taps down as if you were getting a glass of water. You will see a white dial please turn this anti clockwise until the tap pops open and you see the silicon caps.

Step 2) Adjust the silicon caps so that they are positioned over the whole of tap part

Step 3) Push the taps closed and tighten it as far as you can turning the dial clockwise.

Step 1

Step 2

Step 3
